Publications

Constructing Deep Neural Networks
by Bayesian Network Structure
Learning

Bayesian structure learning by
recursive bootstrap

Patents

System and method for video
content analysis- Based detection
surveillance and alarm management

SYSTEM AND METHOD FOR
QUICK OBJECT VERIFICATION

System and Method for Learning
the Structure of Deep Convolutional
Neural Networks

Automatic Video Summarization

System and Method for semantic
video content analysis

Guy Koren

AI Applied Research at NVIDIA
Netanya, Center District, Israel

Summary

Applied Research Engineer with years of experience in leading AI
algorithm teams to develop AI based products.

Experienced in working with sales force, partners and customers
worldwide.

Experience

NVIDIA

AI Applied Research Team Leader
September 2023 - Present (2 years 1 month)
Israel

Intel Corporation

12 years 6 months

Artificial Intelligence Researcher

April 2021 - February 2024 (2 years 11 months)

Working in Intel Labs exploring ways to improve Intel products using Deep
Reinforcement Learning

Data Science Team Leader

April 2019 - April 2021 (2 years 1 month)

Israel

Working on interesting projects that levelrage classic ML , Deep Learning
techniques for predictive modeling on raw sensory data with imbalanced and
noisy labels as well as Real World Reinforcement Learning for various control
problems.

Deep Learning Algorithms Engineer

May 2016 - April 2021 (5 years)

Computer Vision and Deep Learning Software Group

Research and development of Deep Learning algorithms and applications
to derive architectural recommendations for acceleration. Focusing on Deep
Generative and Recurrent Models.

Algorithms Team Leader

February 2014 - May 2016 (2 years 4 months)

Computer Vision Group

Algorithm development and accelerators definition in the domain of Computer Vision and machine learning,

GPU Media Architect

September 2011 - February 2014 (2 years 6 months)

DVTel

Director of Product Management - Edge Device and Video Analytics

March 2011 - August 2011 (6 months)

Israel

NICE systems

13 years 7 months

Director of CA Development

June 2004 - March 2011 (6 years 10 months)

Managing R&D group of up to 15 B.Sc, M.Sc and Ph.D engineers that comprise applications and algorithms teams in the domain of Pattern Recognition and Machine Learning, Image and Video Processing and Computer Vision.

Initiating and managing joint venture research projects in the domain of video analytics with leading Israeli academic teams and industries as part of the Israeli Chief Scientist Office funding programs (MAGNET and MAGNETON).

Defining methodology for research and development of video analytics applications based on CVPR and managing its practical implementation.

Designing of Video analytics solutions from the stage of requirements analysis and site planning through research and development to large scale deployment on strategic customers' sites worldwide.

High Level Designing of software infrastructure for video analytics applications on various platforms (TI DSP and "Wintel" based platforms).

Developing sales tools and collateral.

Building and delivering training courses on advanced technology for worldwide sales force and partners.

Presenting in various Video Analytics international conferences (IMS research VCA conference, IMVC).

Cooperating with partners on implementation of video analytics algorithms on external platforms.

Member in the steering committee of IMVC 2011.

DSP Algorithms team leader

October 1999 - June 2004 (4 years 9 months)

Led and conducted Research & Development of algorithms in the domain of Video Processing and Content Analysis

Worked with material experts to define operational requirements of Video Analytics applications

Field deployment of video analytics applications

Supervision on B.Sc. Students' Final projects in the Technion and Tel-Aviv University

DSP Engineer

July 1998 - October 1999 (1 year 4 months)

Research & Development of algorithms in the domain of Video Processing (Video Compression and Decompression)

Development of video processing operating system for Video Compression on TI DSP's (h.263+ on TI C62)

Student Job at DSP group

September 1997 - July 1998 (11 months)

Research and Development of algorithms in Audio Processing (telecom industry)

Intel

Student job

1996 - 1997 (1 year)

Chip Design in P55c (MMX) development team

Education

Tel Aviv University

MBA, Finance · (2007 - 2009)

Tel Aviv University

M.Sc, Electrical Engineering · (1998 - 2003)

Technion - Israel Institute of Technology

B.Sc, Computer engineering · (1994 - 1998)
